

## APPLICATION DEVELOPER AFTER-SALES (m/f/d)

You shape the sustainability of mobility and develop aftersales solutions for the automotive industry with us. As an aftersales application developer, you design, develop and integrate system solutions and test programs based on our large A/S product portfolio, tailored to the specific needs of our customers. You maximize customer benefit by combining the perfect symbiosis of offboard, onboard and cloud diagnostics as well as lifecycle management.

### Your Tasks

You model the vehicle fleet of our customers in our tools covering all spectrums of the lifecycle.

You program workshop workflows and create and annotate diagnostic data for generic use in workshop processes.

You build the diagnostic interface of control units in a machine-readable and reusable format and develop ECU coding and flash routines.

### Your Profile

An interesting working environment in a highly motivated, creative development team.

Highly topical issues and development tasks in the field of the automotive future.

An attractive customer environment from the international automotive industry.

Exciting and varied activities with individual development opportunities.

Creative scope and short communication channels in a flat hierarchy.

### Your Profile

You have successfully completed a degree in a technical field (FH/TH) or have a comparable qualification.

You have good programming skills, preferably in an object-oriented programming language such as Java, C++, C#.

You are fluent in written and spoken English.

You are an absolute team player and achieve your greatest successes in exchange with your team members.
