

APPLICATION DEVELOPER VEHICLE PRODUCTION / AFTER-SALES (m/f)

As an application developer vehicle production / after-sales, you are involved in the development of innovative products, which put vehicles and components to the acid test during and after production and which ensure quality and reliability. You create processes for the highly automated testing, calibration and data supply of the vehicles' electronics in our authoring system in a graphical Java-combined programming language and put your stamp on the processes which you develop.

Your Tasks

Together with us, you shape the future of automotive production:
Within the team, you develop innovative solutions, e.g. for the electronic testing of electronic control units and for the optimization of on-site processes by means of Big Data analysis.

In the after-sales area, you look for new ways to efficiently develop and implement our workshop processes while you enjoy your creative freedom.

Your Profile

- A degree in technical studies (FH/TH)
- Good or very good programming skills in an object-oriented programming language
- Reliable knowledge of the English language
- You enjoy working in a team

We Offer You

- An interesting work environment in a highly motivated, creative developer team
- State-of-the-art topics and development tasks in the field of the automotive future
- An attractive customer environment from the international automotive industry
- Exciting and varied activities with individual development opportunities
- Creative leeway and short communication channels in a flat hierarchy
