

PROJECT MANAGER (m/f)

As a project manager in Minnesota, you routinely coordinate and organize challenging projects in the automotive industry in the quality management department. You are the first contact if there are any problems and the interface between our company and internal and external customers.

Your Tasks

You are responsible for the coordination, organization and implementation of quality improvement projects in support of the OEM automotive client.

You prove your organizational and business skills in project calculation, controlling and planning.

You are responsible for project team setup containments of automotive parts, ensuring that only approved components will be sent to the OEM customer for vehicle assembly.

Your Profile

A degree (B.Sc.) from a four-year college or university in engineering or related field; or three to five years' experience and/or training; or equivalent combination of education and experience

Hands-on project experience in automotive service industry fields of dealership management, programming of software and technical training according to customer specification

Strong knowledge of MS Office tools

A high degree of self-initiative as well as good organizational and negotiating skills

High flexibility and readiness to travel

Good written and oral communication skills in contact

We Offer You

An interesting work environment in a highly motivated, dynamic project team

State-of-the-art topics in the field of the automotive future

An attractive customer environment from the international automotive industry

Exciting and varied activities with individual development opportunities

Creative leeway and short communication channels in a flat hierarchy
