

BIG DATA ENGINEER (m/w/d)

You are involved in the development of innovative products, which put vehicles and components to the acit test during and after production and which ensure quality and reliability. You create processes for the highly automated testing, calibration and data supply of the vehicles' electronics in our authoring system in a graphical Java-combined programming language and put your stamp on the processes which you develop.

Your Tasks

Research, Design and Integration of optimal Big Data technologies for our Data Analytics solution.

Enhance our existing solution platform by integration of cloud based Big Data platform and Analytics services and APIs (e.g. Microsoft Azure, Amazon AWS).

Communicate effectively with Product Management, Architects and Developers to understand customer requirements.

We Offer You

Cooperation and team spirit are taken seriously at SKYLYZE. We offer an enjoyable working atmosphere, not least thanks to many nice and open-minded colleagues

We promote your professional and personal development with an individual training program. Being a global organization we offer numerous options to develop your career.

We reward your good performance und initiative with a corresponding salary and let you participate in the company's success.

Flexible working hours enable you to fit private appointments into daily routine.

Shared activities like our seminar trip, summer bbq and Christmas party are established and popular events.

Your Profile

General programming best practices.

Experience with some of the following technologies: Big Data frameworks, such as e.g. Hadoop and Spark, Cloud based Data Management and Analytics Services and APIs, such as e.g. Microsoft Azure or Amazon AWS, NoSQL Database platforms

You like to work in a team.
