

# SOFTWARE DEVELOPER CLOUD

For our Connected Cars cloud platform, you develop innovative solutions around the latest technologies for cloud-based remote diagnostics, preventive maintenance, and business models of the future.

## Your Tasks

In our interdisciplinary team, you develop sophisticated software solutions of the future.

You are involved in the development of innovative software for connected vehicles, which accompany the vehicles throughout their whole life cycle and which ensure quality and reliability.

You drive our systems solutions forward by proactively contributing and bringing in your own know-how.

## Our Offer

An interesting work environment in a highly motivated, creative developer team

State-of-the-art topics and development tasks in the field of the automotive future

An attractive customer environment from the international automotive industry

Exciting and varied activities with individual development opportunities

Creative leeway and short communication channels in a flat hierarchy

## Your Profile

A degree (B.Sc./M.Sc.) in computer science or a comparable qualification

Professional experience in software development, at best with Java or C#

Knowledge of one or several of the following frameworks and technologies:

- Cloud-based software development under Microsoft Azure or another cloud provider
- Development of microservices preferably with Microsoft.NET or Spring Boot
- Azure cloud services for messaging, storage and analytics
- Development of container-based applications with Kubernetes or Azure Service Fabric

Enthusiasm in the automation of build and deployment processes, e.g. with Jenkins, Git, Maven, Docker, Powershell

Good knowledge of the English language in speech and writing

Nice-to-have is knowledge in

- CI/CD under Microsoft Azure
- Web technologies, such as HTML5, CSS, JavaScript, Angular, Responsive Design
- SQL and/or NoSQL databases
