

SYSTEM ENGINEER FOR LINUX SERVER (m/f)

As a system engineer for Linux server, you are the direct contact person for the technical support of our customers on-site. You are the link between development engineers and customers and maintain sophisticated software projects that put vehicles and components to the acid test during and after production and ensure quality and reliability.

Your Tasks

As part of our dynamic team, you are involved in the realization of sophisticated software solutions of the future.

You put sophisticated server and diagnostic systems into operation and ensure that customers receive comprehensive training on our software.

With drive, you actively shape tomorrow's automotive industry by searching for new ways to efficiently implement processes, testing and system integration.

We Offer You

A detailed job training and interesting work environment
State-of-the-art topics in the field of the automotive future

An attractive customer environment from the international automotive industry

Exciting and varied activities with individual development opportunities
Creative leeway and short communication channels in a flat hierarchy

Your Profile

A degree in technical studies or a vocational training as IT in specialist system integration

Very good Linux and network skills

Experience in the areas of SQL and scripting languages

Basic knowledge of database systems (PostGres, Oracle)

High willingness to travel and intercultural competence

Good organizational talent and independent mode of operation

Good communication and presentation skills

It is advantageous to have knowledge of a foreign language, such as English, French or Spanish
