

PROJECT MANAGER AUTOMOTIVE / WOLFSBURG (m/f/d)

Are you passionate about the exciting topics of the automotive future and want to shape the mobility of tomorrow? You already have experience in the automotive industry and you are looking for a new challenge as automotive project manager at our customer's site in Wolfsburg? Then join the team@DSA.

Your Tasks

You are responsible for the planning, concepts, costing and implementation of IT projects for our automotive customers.

You manage ongoing software projects and ensure that they are planned properly, on budget and on schedule.

You are responsible for the evaluation and implementation of customer specifications in cooperation with our development team.

You manage the communication of orders with our customers and coordinate the generation of technical documentation.

You coordinate external trades and service providers.

You are responsible for the quality assurance of our deliveries directly at the customer's site.

You report to the management board and the project-related committees.

Your Profile

You have graduated in computer science, electrical engineering, communications engineering or comparable courses of study.

You have at least 5 years of experience as a software project manager or system engineer.

You have a strong customer orientation, a professional appearance as well as excellent teamwork and communication skills.

You are characterized by your high commitment, your proactive approach and your very high quality awareness.

In project management you show your organizational skills and your distinct ability to coordinate complex and distributed development teams.

Your strengths include assertiveness, an independent way of working, organizational skills and flexibility.

You have excellent language skill in German and English.
